

## AOC DATA SHEET

# 40G Active Optical Cables

Champion ONE's 40G Active Optical Cables (AOCs) fill the need for short, cost-effective connectivity. In high-capacity interconnections, AOCs provide a power-efficient, easy-to-use replacement for optical transceivers and fiber jumper cables. These AOCs are fully compliant with EEPROM and memory map requirements to ensure proper system identification and interoperability.

Champion ONE offers both straight QSFP+ AOCs and breakout AOCs with 4x10G SFP+ optics at one end for breakout/aggregation applications.

2. Custom lengths are available in whole meter increments between the standard minimum and maximum length.

## Ordering Information: Programmed Cables

To order a cable programmed for use in a specific system, simply add “-C1” to the end of your network platform part number. For example, to order a 3m AOC programmed for 100% Cisco compatibility, your C1 part number will be **QSFP-H40G-AOC3M-C1**.

The technical specifications listed on page 1 will be the same for all programmed options.
